Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 22, 23

because:

☐ the said international application, or the said claims Nos. _____
relate to the following subject matter which does not require an international preliminary examination (*specify*):

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. _____
are so unclear that no meaningful opinion could be formed (*specify*):

by the description that no meaningful opinion could be formed.

☒ no international search report has been established for said claims Nos. 22, 23

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	1-21	YES
	Claims		NO
Inventive step (IS)	Claims	1-21	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-21	YES
	Claims		NO
2. Citations and explanations (Rule 70.7)			
Reference is made to the following document:			
D1: EP 0 579 508 A (BRITISH AEROSPACE)			
19 January 1994 (1994-01-19).			
<u>Independent method claim 1:</u>			
Document D1, cited in the search report, represents the closest prior art. Said document discloses all the features of the preamble of claim 1:			
<ul style="list-style-type: none">- a method for the assisting the landing of a motorised flying object (page 1, lines 11-12),- said method involving the supply of a fluid flow, which is generated in a stationary manner relative to the landing and take-off surfaces, to introduce energy into the flying object (page 1, lines 13-15; page 2, lines 37-39).			
By contrast with the aforementioned prior art, in the present application, the density of the fluid stream is adjusted according to the circumstances.			
Thus, the claimed method is novel (PCT Article 33(2)).

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

Increasing the density of the fluid stream causes an increase in the deceleration or acceleration effect thereof on the aircraft. This procedure is not rendered obvious by the prior art citations. Thus, the claimed method also involves an inventive step (PCT Article 33(3)).

Dependent method claims 2-9:

Claims 2-9 are dependent on claim 1 and, in consequence, also satisfy the requirements of the PCT in respect of novelty and inventive step.

Device claims 10-21:

The features of independent device claim 10 correspond to the method features of claim 1. In particular, the design of the fluid stream generator for varying the density of the supplied fluid stream is claimed. Claim 10 is therefore likewise novel and inventive (PCT Article 33(2) and (3)). Claims 11-21 are dependent on claim 10 and, in consequence, also satisfy the requirements of the PCT in respect of novelty and inventive step.
